## P R E F A C E.

1. This preface has been written with reference to all the Gazetteers of the series, not for this volume in particular.

2. All the tables and other statistics in Parts I and II of the B volumes of the Gazetteers have been prepared in the offices of the respective districts from their own records; we have referred to the Deputy Commissioner for corrections numerous cases in which an apparent error has been noticed in the census office, but we could not accept responsibility for the accuracy of the figures. The vital statistics in Part II have been noted as differing in many cases from the corresponding figures in the provincial sanitary or health reports, but have generally been allowed to stand as submitted by the Deputy Commissioner.

3. Part III, which was also prepared in the district offices, is probably correct as a rule so far as it relates to the census of 1921 and within the normal range of error of such a tabulation. There are doubtlessly a few errors still remaining in some districts in the list of existing village-tracts. The names of some village-tracts have no doubt been omitted and the corresponding population assigned to some other village-tract; while on the other hand some hamlets which form only parts of village-tracts may have been listed as separate village-tracts. But persistent efforts have been made in the census office to remove these defects, and district officers have generally seconded these efforts willingly; the residue of error is a result of the defects in the records of village-tracts in most districts to which reference was made in the preface to the 1911 edition of this Gazetteer. The entries in column 19 of the tables of Part III must always be regarded as approximate unless all the serial numbers of the table of 1911 are accounted for; efforts were made to get this column as correct as possible, but it would hardly be possible to achieve finality and in some localities it had to be given up. In many cases it has been reported that the village-tract represented by some name in the 1911 edition could not be discovered; but generally if a blank is shown in this column it may be supposed that the village-tract has been formed by the subdivision of some tract of 1911. In any particular case in which further enquiry is necessary it is suggested that an examination of the *kwn* maps of the Land Records Department and of the corresponding

assessment roll? (which are required to be divided according to the tracts of the headmen who collect the revenue) will furnish the required information if carried through a series of years.

4. It should be noted that in Part III the columns for Christians include, besides persons of all races professing the Christian religion, all Europeans and Anglo-Indians whether they professed that religion or not.

5. The term *Normal Civil Population* used in Part III of the book is defined in Chapter II of the Census Report of 1921 and includes all the population of the town or ward except the classes separately shown in the table, such as military police or travellers. The staffs of hospitals, jails, etc., are counted as normal civil population although the in-patients, prisoners, etc., are not.

6. Slip copying Register A. of the census of 1921, which is preserved in the record room of each district, gives information similar to that of Part III of this volume for every hamlet in each village-tract.
